Horse Barns & Animal Shelters

Shed Row (Enclosed) Barns

Enclosed Barns are perfect for areas with limited space and warm climates. Use it in your own backyard, at the track, or as a training barn. You can even add a tack room to store you gear!

With an added overhang you can designate a space to clean equipment, tack up, or stack hay. An overhang also provides added protection from the harsh elements.

Enclosed Horse Barns are well ventilated and allow horses see each other while being kept separate.

Above: 12x24 Shed Row Barn
Shown with unfinished Board & Batten siding, two stalls with dutch doors, and charcoal shingles.

Above: 10x16 Shed Row Barn
Shown with tan painted Board & Batten siding, green trim, one stall with a dutch door, one tack room, one window, and hunter green shingles. Includes optional gable vents and cupola with horse weather vane.

Below: 10x36 Shed Row Barn

Above: 12x20 Shed Row Barn
Shown with clay T-111 siding, white trim, two stalls with dutch doors, one window, and pewter gray shingles.

Lean-To Barns

Shelter yourself and your animals! Easy as 1-2-3!

Lean-To Barns not only provide shelter, but comfort too! With additional shelter you can work under a roof to stay out of rough elements! Overhangs provide safety, freedom, and they're so convenient.

Give your animals the freedom to turn-out without exposing them to harsh elements.

8-foot, 10-foot, or 12-foot available.

Run-In Barns

Run-In Barns provide shelter for your animals from snow, wind, rain, and extreme sun. These barns provide year round protection for horses, ponies, or other animals.

Choose from a variety of sizes and styles.

Run-In Barns have many uses beyond the basic animal shelter. Store hay or farm equipment... or even firewood! These structures are truly versatile!

Above: 10x24 Run-In Barn
Shown with tan painted Board & Batten siding, green trim, two run-in areas, and pewter grey shingles. Includes optional gable vents and drop vents.

Above: 10x30 Run-In Barn
Shown with unfinished Board & Batten siding, three run-in areas, and shakewood shingles. Includes optional 4' overhang.

Left: 10x12 Run-In Barn

Left: 10x20 Custom Run-In Barn
Shown with unfinished Board & Batten siding, one stall with a dutch door, one window, and fox hollow gray shingles. Includes optional run-in area and gable end vents.

Large Barns

Our Construction Division can help you create large horse barns on your property! Large Horse Barns can be built with a raised center isle or a second story. This provides significant ventilation, extra lighting, and a protected area from bad weather to care for your animals.

Customize your barn to fit YOUR needs! We can provide the safest, most attractive, and most comfortable home for your animals.

Options

Customization is key when building your barn. Add skylights, vents, hayracks, LVL headers, chew guards, hurricane clips, floor-to-ceiling kickboards, additional doors and windows, shutters, sliding doors, transom windows, ramps, cupolas, weather vanes, electrical outlets, lights, feed chests, wall cabinets, saddle and harness cabinets, and more!

Explore ALL of the possibilities!
Talk to a Pine Creek Structures representative about how to customize a barn for YOUR needs.
