

# Chicken COOPS

## RAISING CHICKENS IS A GREAT FAMILY PROJECT!

*Teach your children or grandchildren how nature works and enjoy having **fresh** eggs in the house without going to the store.*

# Chicken CONDO

*Our Chicken Condo is great at maximizing space. It features a ramp leading down to a lower area enclosed with wire, doubling the amount of enclosed space your feathered friends have to move around. The egg doors on the front make gathering eggs simple and easy, with no need to go inside.*

**4' x 6' MINI CHICKEN CONDO**

This model includes two easy-open windows, an access door, a turn-out door, three nesting boxes with egg doors, roosts, and a ramp from interior to wire enclosed area below. *Designed for up to 15 chickens.*

**6' x 8' LARGE CHICKEN CONDO**

This model includes five easy-open windows, an access door, two turn-out doors, four nesting boxes with egg doors, roosts, and a ramp from interior to wire enclosed area below. *Designed for up to 25 chickens.*

*Inside a 6x8 Chicken Condo*

## CHICKEN CONDO *Features & Benefits*

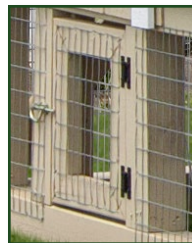

- Easy-Open Windows that open from the outside for light and ventilation
- Entry Door for easy access and cleaning
- Architectural Shingles (in choice of color) installed with nails
- LP Smart Side (in choice of color)\* with a coated finish on the interior side. *\*If polyurethane color is chosen, 4x4s and 2x4s of base will be left unpainted.*

- Nesting Boxes: Shingle roof with flashing to eliminate leaks and rotting
- Egg Doors: Gather eggs from outside with ease! Egg collection door at each nesting box for easy access
- Bottom Area Enclosed with Wire: Allows your chickens to get out in the open air; provides protection from hawks and other predators; and provides shade on hot summer days

- Turn-Out Door allows your chickens to range freely
- Built-in Roosts for your chickens' comfort.
- 10" Overhang to protect from weather
- Sturdy Pressure-Treated 4x4 Runners
- Built-in Ramp drops down to allow chickens access from the upper coop to the open bottom area. (Ramp is on hinges & closes by simply pulling a rope).

# King COOP

*Looking for something bigger with more room to move in? Our new King Coop was designed with you in mind! While the King Coop requires a bigger space in your backyard, it also provides more comfortable access inside.*

**6' x 12' KING COOP**

This 6' wide model includes a 6' x 7' exterior run area, a 6' x 5' interior area, three nesting boxes with an exterior access door, three windows, and a small exterior storage area for feed or other supplies.

**8' x 12' KING COOP**

This 8' wide model includes an 8' x 7' exterior run area, an 8' x 5' interior area, five nesting boxes with an exterior access door, three windows, and a small exterior storage area for feed or other supplies.

## KING COOP *Features & Benefits*

- 8" Roof Overhangs on all sides
- 1 x 6 Face Boards
- Sturdy Pressure-Treated 4x4 Runners
- Plenty of Inside Headroom to move around and clean up
- LP Smart Side (in choice of color)\* with a coated finish on the interior side. *\*If polyurethane color is chosen, 4x4s and 2x4s in exterior run area will be left unpainted.*

- Architectural Shingles (choice of color) installed with nails
- Easy-Open Windows that open and close from outside for light and ventilation
- Entry Doors for easy access into both the inside and the run area
- Turn-Out Doors between each area allows your chickens to range freely

- Nesting boxes with an exterior access door makes gathering eggs simple
- Built-in Storage Space for feed
- Built-in Roosts inside for your chickens' comfort
- 5/8" Coated Engineered Floor Sheeting in interior area

## Chicken Facts

The eggs you buy at the supermarket have a pale yellow yolk, because most supermarket egg chickens never see the natural light of day, or feel the natural breezes blowing. They never even get the chance to do just a short healthy sprint during their production period because of being confined to cages—only allowing them a minimal amount of space.

Chickens naturally like to get out in the dirt and grass to do their scratching and pecking—therefore increasing the quality of your eggs. If you raise your own eggs you will experience an orange yolk—the way an egg was meant to be!

For every hour of daylight a chicken gets, it will increase its production yield. In fact, if you install a light with a timer in the wintertime (giving your chickens the same time period of light as the summertime), your egg production will be the same year-round.

Chickens will share their nesting boxes. One box will suffice for up to eight chickens.

Chicken manure is one of the richest forms of fertilizer for your yard or garden.
