- Wall framing spaced 16" on center with double studded corners and double plated top wall plates (with interlocking corners)
- You choose the colors of the siding, trim, and doors!

Combine Your Atrium With A Shed!

Instead of a standalone Atrium, you can connect it to a shed and get the best of both worlds... a warm space for plants to grow and for you to work, PLUS storage space for supplies, tools, and equipment.

An Atrium can be connected to a Cape Cod, Victorian, or Studio style shed. If you choose a Studio style, we'll convert your atrium to have a matching lean to style roofline. For best results, we recommend selecting a shed that is two feet wider than your atrium.

When you choose an atrium and shed combo, our Amish craftmen will skip the back gable wall of windows and install another 30" single door in the connecting wall.

12" Exhaust Fan with Themostat and Fan Speed Control

High Tunnel Vent

Atrium Electrical Package Features

Free Local Delivery

The first 20 miles from the store on us!

After initial 20 miles, a small fee per mile is added.

	Atrium	Atrium & Shed Combination
Size	LP Smart Side	To attach your atrium to a shed, we recommend choosing a shed size two feet wider than your atrium. An Atrium can be combined with a Cape Cod, Victorian, or Studio style shed. **Add the price of the shed (varies by size and style) to the price of the atrium.** For atrium and shed combinations, the windows on the back gable end are swapped for a 30" single door connecting to two areas.
